Annual Tuition and Fees at Colleges and Universities, 2013-14

THIS TABLE shows the tuition and required fees at more than 3,200 colleges and universities in the 2013-14 academic year. Tuition and fees for both in-state and and out-of-state residents are listed. Where no out-of-state figure is listed, the tuition is the same for all students, regardless of residence. Figures under "1-year change" reflect the percentage change in tuition and fees for in-state residents from 2012-13 to 2013-14. Room-and-board charges are listed where available, but they may represent differing numbers of meals per week and so might not be comparable among institutions.

In addition, *The Chronicle*'s Web site publishes institutions' totals for tuition, fees, room, and board since the 1998-99 academic year, and allows readers to adjust figures for inflation."

The figures represent charges for first-time, full-time undergraduates, typically on the basis of a nine-month academic year of 30 semester hours or 45 quarter hours. A single asterisk indicates that an institution provided projected figures for 2013-14. Two asterisks indicate that an institution lists its price as one comprehensive fee.

The data do not reflect the cost of attendance at an institution after grants and other student aid are considered. This net cost is lower than the published fees shown.

The College Board collected the figures for 2013-14 in its "Annual Survey of Colleges 2013." © 2013, the College Board. This material may not be copied, published, rewritten, or redistributed without permission.
