Emergency Action Plan and Severe Weather Protocols

This handbook is to provide coaches and administrators with an Emergency Action Plan should EMS be activated for emergencies or in case of severe weather conditions. Severe weather and emergencies may arise at any time during athletic events. Since weather is unpredictable, you can never give exact guidelines. Good common sense should also be utilized. Severe weather is defined as any weather related situation requiring all athletes and spectators to move to safe shelter. Expedient action must be taken in order to prevent life threatening conditions. Student safety is a priority over the completion of an athletic event.

Coaches and administrators should be aware of the following protocols in order to be prepared should severe weather or emergency arise. These protocols are in accordance with UIL and state law mandates and in conjunction with CISD policies and procedures.
CISD CHAIN OF COMMAND
The Office of School Administration, the Athletic Coordinators, and the Sports Head Coaches will work together to implement the policy at the time of the event. The Athletic Trainer will have a weather watcher that monitors the forecast. Contracted trainers will contact Middle School and High School Athletic Coordinators and High School Trainers. Middle School and High School Athletic Coordinators will contact campus Principals. The Office of School Administration will communicate with Fine Arts. The above guidelines determine alterations to practice and game schedules. Decisions on contests will be made accordingly. **Athletic Coordinators will contact the Office of District Safety and Security at 817-297-5292.**

**Emergency Contacts**
- CISD Athletic Director – Charles Lincoln O: 817-297-5248
- CISD Athletic Administrative Assistant – Lana Dawson O: 817-297-5248
- CHS Athletic Coordinator – J.J. Resendez O: 817-297-5810
- CHS Campus Principal – Daryl Moffett O: 817-297-5810
- CHS Campus Resource Officer – Connors O: 817-297-5810
- CHS 9th Administrator – Christopher White O: 817-297-5845
- CHS 9th Resource Officer – Sgt. Neal O: 817-297-5896
- CHS Athletic Trainer – Lou Watanabe O: 817-297-5810
- CHS Athletic Trainer – Tara Flowers O: 817-297-5810
- HF Stevens MS Campus Admin – Kimberly Buckhalton O: 817-297-5840
- HF Stevens Athletic Coordinator (Boys) – Victor Valdez O: 817-297-5840
- HF Stevens Athletic Coordinator (Girls) – Neila Gray O: 817-297-5840
- HF Stevens MS Resource Officer – Officer Gary Moseley O: 817-297-5840
Safety Training

Senate Bill 82, in effect since the 2007-2008 school year, related to safety regulations for certain public school extracurricular activities.

This legislation:

1. Requires safety training for all coaches or sponsors for athletic activities, and any marching band director. UIL has developed a safety training program for coaches and sponsors of athletic activities that is available through the UIL Online as part of the Rules Compliance Program. Visit the Rules Compliance Program to complete Safety Training.

   Additional information from the Texas Administrative Code, Chapter 76.1003, on these requirements as they pertain to athletic trainers and team physicians.

2. Mandates that schools, at least once per year, conduct a safety drill that incorporates the training described in the safety training program developed by UIL.

3. Requires that student athletes be provided training in recognizing symptoms of catastrophic injuries, including head and neck injuries, concussions, asthma attacks, heatstroke, cardiac arrest and injuries requiring use of an AED, the risks of using nutritional supplements. This training can be conducted by the school, using the materials available on the SB 82 portion of the Health and Safety Section of the UIL web site. Download safety training Powerpoint presentation. (revised September 2017)

4. Mandates that unsafe athletic activities are prohibited and schools must make sure that safety precautions are required (asthma medication, hydration materials present, emergency lanes clear etc.)

5. Requires that any student who is rendered unconscious while participating (in practice or game) cannot participate further in that practice or game any more and must get written clearance prior to any further participation.

6. Mandates that records of compliance with the requirements of the legislation be kept and be made public upon request.

7. Requires that non-compliance with the provisions of the bill could subject the school to penalties as outlined in section 27 and 29 of the Constitution and Contest Rules.

8. Mandates that the Texas Education Agency create hotline number and email address for reports of non-compliance and schools must post that information in their administration offices. To report complaints or violations, contact the Curriculum Division of the Texas Education Agency by phone at 512-463-9581 or by email at curriculum@tea.state.tx.us.

9. Requires the text of sections of bill as well as the Parent Information Manual must be provided to parents of participants. The bill does allow that the required materials can be provided electronically, unless specifically requested otherwise.
Severe Weather Protocols

Lightning Protocol

**Chain of Command** – The Office of School Administration, the Athletic Coordinators, the Game Day Administrator and the Athletic Trainer will work together to implement the policy at the time of the event. The Athletic Trainer will have a weather watcher that monitors the forecast. Contracted trainers will contact Middle School and High School Athletic Coordinators and High School Trainers. Middle School and High School Coordinators will contact campus Principals.

**Thor Guard Monitoring and Siren System** – CISD uses the Thor Guard system as it’s primary source for inclement weather detection and lightning safety specifically. Thor guard uses top of the line predictive science to determine imminent danger. When the system predicts the right climate for lightning in the predetermined point of reference, a siren will sound that can be heard throughout campus to alert all participants, coaches, and spectators to seek immediate shelter in one of the designated safe zones. In addition, a strobe light that is mounted by the siren will continue to flash letting all know that all outside activity is suspended until the threat clears. Once the system has determined that all inclement weather has moved outside the area, the siren will signal a safe return to the fields by sounding 3 short blasts and the strobe light will turn off.

**WeatherSentry Monitoring System** – CISD utilizes the Weather Sentry monitoring system as a secondary source that provides all current/real time alerts and information using radar detection of predetermined points of reference that include an Advisory area (20 mile circumference), a Caution Area (15 mile circumference) and a Warning Area (8 mile circumference) around athletic venues. Alerts are sent through text messages and other means to participating coaches, athletic trainers, and administrators giving specific instructions and information regarding inclement weather situations. This means of observation should be utilized before any other to determine safety and subsequent changes in schedules (ie: postponements, cancellations, evacuations…etc)

**In a situation where any CISD team is participating in a venue that is outside the scope of our preferred monitoring systems (off-campus sites), the following monitoring protocols are recommended.** However, we encourage our teams to check with their host venue and follow their specific protocols.

**The 30-30 Lightning Safety Rule** - Using the **Flash-to-Bang** method will be our primary way of tracking a storm. Thunder always accompanies lightening. The audible range of thunder is 8-10 miles. Light travels at the speed of 1 mile every 5 seconds. To use the **Flash-to-Bang** method, count the number of seconds once lightening is sighted until the thunder is heard. Divide by 5 to determine how far away, in miles, the lightening is occurring. Play is suspended when the **Flash-to-Bang** method reaches 30 seconds or less. This means the lightning storm is 6 miles away or closer.

**Skyscan Lightning Detector** - The Skyscan lightning detector will be used as a secondary source to the **Flash-to-Bang** method. The Athletic Trainer will monitor the Skyscan. This instrumentation is effective but cannot guarantee safety. This unit is only used to track the stages of potential lightning. If two consecutive readings in the 3-8 mile range or closer are observed on the monitor, the field will be cleared.

**Resumption of Play** - Resumption of play occurs when lightning has not been detected for 30 minutes. Every time lightning is detected within the 8 mile or less range, the 30-minute clock will restart. The administrator on duty will make the final decision as to whether a contest will be suspended or postponed

**List of Safe Locations** - A safe location is any large enclosed building with plumbing and/or electrical wiring that is used to ground the structure. The secondary safe location is in any vehicle with a hard metal roof, such as a personal vehicle or school bus. Do not touch the sides of the vehicle. While in the safe location, stay away from metal objects, phones and computers that have a land line (cell phones are acceptable).

**Places to Avoid** - Avoid any structure that has an exposed opening such as metal sheds and baseball/softball dugouts. Also avoid high places, open fields, trees, bleachers, metal fences, and open water.

The following guidelines will be used to determine alterations to practice and game schedules due to inclement weather. The occurrence and distance of lightning will be determined from a weather verification service. Decisions on contests will be made accordingly. **Athletic Coordinators will contact the Office of School Administration at 817-297-5292.**

**Field Conditions**

**Chain of Command** – The Office of School Administration, the Athletic Coordinators, and the Sports Head Coaches will work together to implement the policy at the time of the event. The Athletic Trainer will have a weather watcher that monitors the forecast. Contracted trainers will contact Middle School and High School Athletic Coordinators and High School Trainers. Middle School and High School Athletic Coordinators will contact campus Principals. The Office of School Administration will communicate with Fine Arts.

The above guidelines will be used to determine alterations to practice and game schedules. Decisions on contests will be made accordingly. **Athletic Coordinators will contact the Office of School Administration at 817-297-5292.**
Heat Policy – Hot Weather Protocol

The following are guidelines for coaches and athletic trainers to help prevent heat related illnesses and emergencies. High School and Middle School events will follow the recommended UIL District Guidelines. These guidelines will be strictly followed. Failure to do so could result in serious illness or death.

Practice or competition in hot and humid environmental conditions poses special problems for students. Heat stress and resulting heat illness is a primary concern in these conditions. Although deaths from heat illness are rare, constant surveillance and education are necessary to prevent heat-related problems.

To decrease the risk of heat illness/emergencies:

- Gradually Acclimatize Athletes – get them accustomed to working out in the heat. A gradual acclimatization for the student(s) to hot/humid conditions is recommended. We encourage gradual increase exposure to hot and/or humid environmental conditions over a period of 7 to 10 days for students to achieve acclimatization. For example:
  - Football – There is a 5 day acclimatization period required by UIL. The first 2 days only tshirts, shorts, and helmets are permitted. The next 3 days in helmets and shoulder pads only. For practice/break time allowances, frequencies and other limitations, see UIL Fall Football Practice Regulations on the UIL website.
  - Cross Country - These athletes must be monitored closely at all times. Running distance should be increased gradually. Monitor weather conditions closely with staff Athletic Trainers as outlined below.
  - Volleyball and Basketball (indoor sports) - Coaches should be aware that heat problems can occur indoors if the athletes are not properly hydrated. If a coach chooses to practice outdoors, he/she should be aware of the weather conditions. These athletes will not be accustomed to the heat outdoors. They MUST be monitored very closely and water should be readily available. The first 3-4 practices (indoors or out) should not be overly strenuous.
  - Soccer, Track, Tennis, Baseball and Softball - The first 3-4 practices should not be overly strenuous. Overuse/friction injuries will be dramatically decreased in these sports if athletes start workouts at 50% and ease in to a full 100%. This usually takes two to three weeks for track athletes.

- Golf - The coach needs to monitor weather conditions daily. See temperature/humidity readings chart.
  - Identify Susceptible Athletes - Those athletes that are obese or have a larger muscle mass tend to have more heat related problems. Keep a close eye on these athletes.
  - Uniforms - Use lightweight, breathable jerseys/pants in hot weather months. Watch for athletes wearing extra clothing.
  - Allow Fluid Replacement - Athletes should have unlimited access to cold water at all times. DO NOT RESTRICT WATER AS A FORM OF MOTIVATION!
  - Encourage a Good Diet - Athletes MUST eat lunch to workout in extreme heat. Fat intake should be somewhat decreased. Salt intake can be slightly increased. Athletes should stay away from carbonated beverages in season.
  - Alter Practice Schedule According to Temperature/Humidity Readings - A sling psychrometer is an instrument that measures the ambient temperature and the relative humidity at a practice site and can be used to monitor heat index. CISD uses alerts from Weather Sentry as well as any alerts and advisories from all national weather outlets.

Practices may be altered according to the following conditions:

| Temperature Scale (Heat Index) / Relative Humidity |
|--------------------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|
| Temp F   | 30% | 40% | 50% | 60% | 70% | 80% | 90% |
| 86       | 84.4 | 86.3 | 88.3 | 91 | 95 | 99.4 | 104.6 |
| 88       | 86.5 | 88.8 | 91.4 | 94.9 | 99.8 | 105.6 | 111.8 |
| 90       | 88.8 | 91.5 | 94.9 | 99.3 | 105.2 | 112.3 | 119.5 |
| 92       | 91.2 | 94.4 | 98.9 | 104.3 | 111.3 | 119.5 | 127.7 |
| 94       | 94   | 97.6 | 103.3 | 109.9 | 118.2 | 127.1 | 136.3 |
| 96.9     | 96.9 | 101.2 | 108.1 | 116.1 | 125.4 | 135.1 | 145.3 |
| 99.8     | 99.8 | 105.1 | 113.2 | 122.4 | 132.8 | 143.4 | 154.6 |
| 100      | 103  | 109.3 | 118.6 | 128.9 | 140.4 | 152  | 164.2 |
| 102      | 106.1 | 113.8 | 124.3 | 136 | 148.3 | 160.9 | 174.1 |
| 104      | 109.5 | 118.7 | 130.4 | 143.3 | 156.6 | 170.2 | 184.4 |
| 106      | 113.4 | 124 | 136.9 | 151 | 165.3 | 179.9 | 195.1 |
| 108      | 117.7 | 129.7 | 143.8 | 159.1 | 174.4 | 190  | 206.2 |
| 110      | 122.4 | 135.8 | 151.1 | 167.6 | 183.9 | 200.5 | 217.7 |

Adapted from Texas Department of Health
Accommodations for CISD Athletic Participation in Hot Environments

**Heat Index 95-99** – Increase frequency of water breaks to approximately one every 20 min. Athletes must have access to heat refuge during practice or break times should they become symptomatic of heat illness.

**Heat Index 100-104** – Increase frequency of water breaks to one every 15 minutes. Athletes must have access to heat refuge during practice and break times should they become symptomatic of heat illness.

No outdoor workouts for unacclimatized athletes. (minimum of 10 consecutive days in heat)

**Heat Index 105** - Suspend all off campus workouts.
Suspend all outdoor activity for grades 7-9. (Move workouts indoors)
Suspend all outdoor sub-varsity workouts for grades 10-12. (Move workouts indoors)
Varsity level football continues practice with pads off.

**Heat Index 110 or above** - Suspend all outdoor activity for all levels/all campuses.

* Athletes will have unlimited access to water during all outdoor activities at all times.

**Cold Weather Protocol**

Cold exposure can be uncomfortable, increase the risk of injury, and impair performance. Factors to take into consideration include more than just the temperature. Wind chill and wet conditions will increase the cooling effect. Wind Chill interacts with the temperature to significantly increase body cooling. The combination of cold air and the deep breathing of exercise can also trigger breathing problems. If the body and clothing are wet, there is an increase of body cooling. This could be from sweat or rain.

1. **Dress in layers** - Athletes should dress in layers and try to stay dry. Heat loss from the head and neck can be as much as 50% of total heat loss; therefore, the head should be covered during very cold conditions.
2. **Warm-up** - Adequate warm-up is essential to prevent injuries, especially in cold conditions. Try to keep warm throughout the practice or contest.
3. **Stay Hydrated** - Dehydration affects the body’s ability to regulate temperature whether it is hot or cold conditions.
4. **Communication** - The Office of School Administration will communicate with Fine Arts.

The following guidelines will be used to determine alterations to practice and game schedules due to cold conditions. The temperature and wind chill readings will be taken from a weather verification service. Decisions on contests should be made by 12:00 PM of the day of the contest. **Athletic Coordinators will contact the Office of District Safety and Security at 817-297-5292.**

Temperature is **32 degrees or above** with Wind Chill **below 28 degrees**
Daylight activities may continue following the guidelines above.
Evening activities will not be played.

Temperature is **below 32 degrees** with Wind Chill **below 28 degrees**
All activities are moved indoors or canceled.

*Wet weather could add to the possibility of canceling activities or moving them indoors.*
Emergency Action Plans

Introduction
Emergencies may arise at any time during athletic events. The development and implementation of an emergency plan will help ensure the best care. Athletic organizations have a duty to develop an emergency plan which, when activated, will provide appropriate standards of emergency care to all sports participants. As athletic injuries may occur at any time and during any activity, the sports medicine team must be prepared. This preparation involves formulation of an emergency plan, proper coverage of events, maintenance of appropriate emergency equipment and supplies, utilization of appropriate emergency medical personnel, and continuing education in the area of emergency medicine and planning. Our goal is that through careful pre-participation physical screenings, adequate medical coverage, safe practice and training techniques and other safety avenues, some potential emergencies will be averted and all managed appropriately.

Components of the Emergency Plan
1. Establish Scene Safety and Immediate Care of the Athlete by Emergency Personnel
   With athletic practice and competition, the first responder to an emergency situation is typically a member of the athletic staff, most commonly a coach or athletic trainer. The type and degree of sports medicine coverage for an athletic event may vary widely, based on such factors as the risk level of the sport or activity, the setting, and the type of training or competition. Certification in cardiopulmonary resuscitation (CPR) and automated external defibrillators (AED), athletic safety training, prevention of disease transmission, and emergency plan review is required annually for all athletics personnel. The emergency team may consist of a number of healthcare providers including physicians, emergency medical technicians, licensed athletic trainers; student athletic trainers; coaches; administrators. There are four basic roles within the emergency team. The first and most important role is establishing safety of the scene and immediate care of the athlete. Acute care in an emergency situation should be provided by the most qualified individual on the scene. In instances that an Athletic Trainer is available, this role will be assumed by the Athletic Trainer. The second role, EMS activation, may be necessary in situations where emergency transportation is not already present at the sporting event. This should be done as soon as the situation is deemed an emergency or a life-threatening event. Time is the most critical factor under emergency conditions. Activating the EMS system may be done by anyone on the team. However, the person chosen for this duty should be someone who is calm under pressure and who communicates well over the telephone. This person should also be familiar with the location and address of the sporting event. The third role, emergency equipment retrieval may be done by anyone on the emergency team who is familiar with the types and location of the specific equipment needed. Student athletic trainers, coaches, and athletes are good choices for this role. The fourth role of the emergency team is that of directing EMS to the scene. One member of the team should be responsible for meeting emergency medical personnel as they arrive at the site of the emergency. Depending on ease of access, this person should have keys to any locked gates or doors that may slow the arrival of medical personnel. An administrator, coach, student athletic trainer, or athlete may be appropriate for this role.

2. Activation of the Emergency Medical System
   Activate EMS by calling 911. Proper communication is the key to quick emergency response. Athletic trainers and emergency medical personnel must work together to provide the best emergency response. Access to a working telephone should be assured before athletic events.

3. Emergency Equipment Retrieval
   All necessary emergency equipment should be at the site and quickly accessible when emergency situations arise. Personnel should be familiar with the function and operation of each type of emergency equipment. Equipment should be in good operating condition, and personnel must be trained in advance to use it properly. Emergency equipment should be checked on a regular basis and use rehearsed by emergency personnel.

4. Direction of EMS to Scene
   Emphasis should be placed at having an ambulance on site at high-risk sporting events. There should be a designated location with rapid access to the site and a cleared route for entering/exiting the venue. Ambulance entrance to each facility should be clearly marked and accessible. Personnel should be assigned to meet the ambulance and assist with doors, gates and access to the site. In the medical emergency evaluation, the primary survey assists the emergency care provider in identifying emergencies requiring critical intervention and in determining transport decisions. Emergency care providers should refrain from transporting unstable athletes in inappropriate vehicles. Any emergency situations where there is impairment in level of consciousness (LOC), airway, breathing, or circulation (ABC) or there is neurovascular compromise should be considered a “load and go” situation and emphasis placed on rapid evaluation, treatment and transportation.

Conclusion
Through development and implementation of the emergency plan, the Crowley Independent School District helps ensure that the athlete will have the best care provided when an emergency situation does arise.
Sample Emergency Action Plan

1. Establish scene safety and immediate care of the athlete (Licensed Athletic Trainer or Coach)
   a. Keep bystanders away from scene
   b. Primary survey to determine consciousness, breathing, pulse, and/or life threatening injuries
   c. Provide emergency care until EMS arrives

2. Activation of the Emergency Medical System (Licensed Athletic Trainer, Coach or Administrators)
   a. Making the Call: 911
   b. Providing Information:
      i. name, address, telephone number of caller
      ii. nature of emergency
      iii. number of injured persons
      iv. condition of injured persons
      v. medical treatment of injured persons
      vi. specific directions to locate emergency scene
      vii. other information as requested by dispatcher
   c. Stay on the phone until EMS arrives

3. Emergency equipment retrieval (Coach or Student Trainers)
   a. Retrieve AED
   b. Medical kit with emergency forms
   c. Splint bag as needed

4. Direction of EMS to scene (Student Trainers or Administrators)
   a. Provide specific directions to locate emergency scene
   b. Assign someone to wait outside and bring EMS to scene
   c. Assure necessary gates and doors are unlocked and accessible

5. Other protocols (Licensed Athletic Trainer or Coach)
   a. Notify guardians or next of kin of injured persons
   b. Assign a staff member to accompany injured persons to hospital when available
   c. Contact administrators and complete emergency reports

AED Locations
CHS Eagle Stadium Field House North AED is located inside north entrance hallway.
CHS Eagle Stadium Field House South AED is located inside south entrance hallway.
CHS Eagle Stadium AED is located outside northeast restrooms.
CHS Auxiliary Field AED is located at north end outside of concession building.
CHS Baseball AED is located outside main entrance building door.
CHS Batting Cages AED is located inside batting cages.
CHS Gym Athletic Training Room AED is located outside gym athletic training room door.
CHS Main Gym AED is located outside main gym concession door.
CHS South Gym AED is located outside south gym entrance hallway.
CHS 9th Gym AED is located outside concession door.
CHS Eagle Stadium

Emergency Action Plan:

1. Establish scene safety and immediate care of the athlete
   a. Keep bystanders away from scene
   b. Primary survey to determine consciousness, breathing, pulse, and/or life threatening injuries
   c. Provide emergency care until EMS arrives

2. Activation of the Emergency Medical System
   a. Making the Call: 911
   b. Providing Information: 101 Eagle Drive
      i. name, address, telephone number of caller
      ii. nature of emergency
      iii. number of injured persons
      iv. condition of injured persons
      v. medical treatment of injured persons
      vi. specific directions to locate emergency scene
      vii. other information as requested by dispatcher
   c. Stay on the phone until EMS arrives

3. Emergency equipment retrieval
   a. Retrieve AED
   b. Medical kit with emergency forms
   c. Splint bag as needed

4. Direction of EMS to scene
   a. Provide specific directions to locate emergency scene:
      Eagle Stadium access at southwest corner of stadium. Enter double gates near scoreboard.
   b. Assign someone to wait outside and bring EMS to scene
   c. Assure necessary gates and doors are unlocked and accessible

5. Other protocols
   a. Notify guardians or next of kin of injured persons
   b. Assign a staff member to accompany injured persons to hospital when available
   c. Contact administrators and complete emergency reports

Severe Weather:

An announcement will be made to clear the fields and gyms and proceed to safe shelter.
Safe Shelter will be:
- Eagle Stadium Field House for athletes, coaches, and officials
- CHS Campus
- Concession/Restroom Buildings
- Weight Room / Barn should only be used as last option.
- Bleachers do NOT provide safe shelter.
All athletes and coaches will need to gather all belongings to take inside with them. Student-athletes will NOT be allowed back outside to retrieve personal items. In case of Tornado warning move to interior building hallways and rooms. Stay away from doors and windows.

AED Location:

1st Location: CHS Eagle Stadium AED is located outside northeast restrooms.
2nd Location: CHS Eagle Stadium Field House North AED is located inside north entrance hallway.
CHS Weight Room (Barn)

Emergency Action Plan:

1. Establish scene safety and immediate care of the athlete
   a. Keep bystanders away from scene
   b. Primary survey to determine consciousness, breathing, pulse, and/or life threatening injuries
   c. Provide emergency care until EMS arrives
2. Activation of the Emergency Medical System
   a. Making the Call: 911
   b. Providing Information: 105 Eagle Drive
      i. name, address, telephone number of caller
      ii. nature of emergency
      iii. number of injured persons
      iv. condition of injured persons
      v. medical treatment of injured persons
      vi. specific directions to locate emergency scene
      vii. other information as requested by dispatcher
   c. Stay on the phone until EMS arrives
3. Emergency equipment retrieval
   a. Retrieve AED
   b. Medical kit with emergency forms
   c. Splint bag as needed
4. Direction of EMS to scene
   a. Provide specific directions to locate emergency scene:
      **Weight Room / Barn access on south side of Eagle Stadium Field House parking lot.**
   b. Assign someone to wait outside and bring EMS to scene
   c. Assure necessary gates and doors are unlocked and accessible
5. Other protocols
   a. Notify guardians or next of kin of injured persons
   b. Assign a staff member to accompany injured persons to hospital when available
   c. Contact administrators and complete emergency reports

Severe Weather:

*An announcement will be made to clear the fields and gyms and proceed to safe shelter.*

Safe Shelter will be:

- Eagle Stadium Field House for athletes, coaches, and officials
- CHS Campus
- Concession/Restroom Buildings
- Weight Room / Barn should only be used as last option.
- Bleachers do not provide safe shelter.

All athletes and coaches will need to gather all belongings to take inside with them. Student-athletes will NOT be allowed back outside to retrieve personal items. In case of Tornado warning move to interior building hallways and rooms. Stay away from doors and windows.

4. Direction of EMS to scene
   a. Provide specific directions to locate emergency scene:
      Auxiliary Field access on Northeast corner of field. Enter double gates at main entrance.
   b. Assign someone to wait outside and bring EMS to scene
   c. Assure necessary gates and doors are unlocked and accessible

5. Other protocols
   a. Notify guardians or next of kin of injured persons
   b. Assign a staff member to accompany injured persons to hospital when available
   c. Contact administrators and complete emergency reports

Severe Weather:

An announcement will be made to clear the fields and gyms and proceed to safe shelter.
Safe Shelter will be:
• Baseball / Softball Field House for athletes, coaches, and officials
• Eagle Stadium Field House
• CHS Campus
• Concession/Restroom Buildings
• Weight Room / Barn should only be used as last option.
• Bleachers do not provide safe shelter.
All athletes and coaches will need to gather all belongings to take inside with them. Student-athletes will NOT be allowed back outside to retrieve personal items. In case of Tornado warning move to interior building hallways and rooms. Stay away from doors and windows.

AED Location:
1st Location: CHS Auxiliary Field AED is located at north end outside of concession building.
2nd Location: CHS Batting Cages AED is located inside batting cages.
CHS Softball Field

Emergency Action Plan:
1. Establish scene safety and immediate care of the athlete
   a. Keep bystanders away from scene
   b. Primary survey to determine consciousness, breathing, pulse, and/or life threatening injuries
   c. Provide emergency care until EMS arrives
2. Activation of the Emergency Medical System
   a. Making the Call: 911
   b. Providing Information: 108 Eagle Drive
      i. name, address, telephone number of caller
      ii. nature of emergency
      iii. number of injured persons
      iv. condition of injured persons
      v. medical treatment of injured persons
      vi. specific directions to locate emergency scene
      vii. other information as requested by dispatcher
   c. Stay on the phone until EMS arrives
3. Emergency equipment retrieval
   a. Retrieve AED
   b. Medical kit with emergency forms
   c. Splint bag as needed
4. Direction of EMS to scene
   a. Provide specific directions to locate emergency scene:
      Softball Field access on Northeast corner of field. Enter double gates at main entrance.
   b. Assign someone to wait outside and bring EMS to scene
   c. Assure necessary gates and doors are unlocked and accessible
5. Other protocols
   a. Notify guardians or next of kin of injured persons
   b. Assign a staff member to accompany injured persons to hospital when available
   c. Contact administrators and complete emergency reports
